Panache is a scalable, high-performance, remote file data caching solution with the GPFS cluster file system. It leverages the inherent scalability of GPFS to provide a multi-node, consistent cache of data exported by a remote file system.

Keywords: caching, cluster filesystem, pNFS, wide-area network

These proceedings contain the papers presented at the *9th Annual Genetic and Evolutionary Computation Conference (GECCO-2007)*, held in London, UK, July 2007. For the first time GECCO was held outside the US. This clearly provides an opportunity for researchers from different parts of the world to meet and discuss their work.
